RE: Draft Technical Memorandum (TM) 8: Revised Phase II RFI/RI Workplan for Bedrock, OU 2, March, 1993

Dear Mr. Schassburger,

The Colorado Department of Health, Hazardous Materials and Waste Management Division (the Division), has reviewed the above referenced document submitted by DOE and prime operating contractor, EGGG. The Division's comments are attached.

We encourage DOE to rapidly develop the contingency plan described in this document, but not yet finalized, for our review. This is particularly important as field mobilization for this program has already occurred. In addition, because this plan is designed to test certain assumptions about existing bedrock conditions, these assumptions must be made very clear in the text. The plan objectives to test these assumptions must also be clarified.

If you have any questions regarding these matters, please call Joe Schieffelin of my staff at 692-3356.

Sincerely,

Gary y. Baughman, Chief
